

## ACOUSTIC ENGINEER

SATRA is a leading Research and Technology organisation with an impressive record of providing specialist services on a global basis to some of the most prestigious names in industry.

We are currently expanding our testing operations in the field of Personal Protective Equipment (PPE) and are looking to recruit an enthusiastic, talented acoustic engineer to establish and drive the new business area of testing hearing protection. In the longer term we also expect to develop new acoustic testing business that will utilise the facilities available.

- Ideally the candidate will have a minimum qualification of a degree or equivalent in a numerate science subject, ideally acoustics, but including physics or engineering. This qualification will be backed up by practical experience in the acoustics field.
- The role will include establishing and commissioning the test equipment, drafting the procedures and documentation required to gain UKAS accreditation, training key members of staff, developing and implementing a business plan for the testing and day to day management of the area.
- Candidates must be self motivated with the ability to meet deadlines whilst working in an organised and professional manner. The ability to be able to problem solve either individually or within a team is also required.
- Good communications skills are essential as this position will require direct contact with external customers and internal staff members. As this role will require the development and marketing of a new business area the candidate needs the ability to persuade and influence others, be able to write concise technical reports and marketing literature and to have sound IT skills.

The salary range for this position is £23,000 - £28,000 pa plus benefits, depending on experience.

The position is based at our Wyndham Way headquarters on the Telford Way Estate in Kettering.
