

RBA

ACOUSTICS

As part of our ongoing evolution, RBA Acoustics are searching for pragmatic and forward thinking individuals to join our lively team.

Formed in 2002, we've grown to be one of the leading independent acoustic consultancies in the UK.

With a wide range of services, we provide our clients with practical and reliable advice on all acoustics, noise and vibration related issues.

We're a relaxed but hard working team. Our supportive management structure creates an enjoyable environment that nurtures talent and encourages career development.

Consultant/Senior Consultant

We are seeking a hardworking, experienced and talented engineer to join our team. You must have 3-5 years experience in acoustic consultancy and be a corporate member of the IOA. An all-compassing role, you will manage and be involved in a wide variety of projects from start to finish, and provide ongoing support and guidance to junior employees. You should have a proven background in delivering a variety of services including architectural and environmental acoustics. Candidates must be dedicated and be able to meet deadlines and manage budgets successfully.

Assistant/Graduate Consultant

Ideally suited to a graduate or acoustician with up to 1 year's experience – you will be able to expand your knowledge and development working closely on our wide range of projects. You must have a relevant acoustics based degree or hold an IOA diploma, and have a full UK driving license as travel should be expected. Candidates must be enthusiastic, quick to learn and show an appropriate level of technical competence.

Both positions are based in central London where we offer a competitive salary and bonus scheme alongside a working atmosphere that is second to none.

If you think RBA is the right move for you, please email your covering letter and CV to info@rba-acoustics.co.uk
