Arup's acoustics practice is an international design consultancy embodying unique experience in all areas of acoustic, audio visual, noise and vibration design.

With offices in the UK, USA, Asia and Australasia, we are able to offer opportunities worldwide and draw on international expertise to provide a service which is unsurpassed in our field.

Our scope of expertise encompasses performing arts, recording, commercial, education, healthcare, broadcast, sport, leisure, transportation, the environment and sustainable design.

Arup is always keen to hear from interested graduates and undergraduates. We are now seeking graduates to join us in the UK in September 2011.

As a graduate joining Arup, you will be opening the door to a career in acoustics, with the potential to cover every facet of the built environment in any corner of the world.
