

Acoustics Consultant

ERM is one of the world's leading environmental health, safety, social and risk consultancies with 4,000 staff across 140 offices in 40 countries. A career with ERM is exciting and dynamic, with excellent opportunities for career development, variety of work and all of the advantages that our global reach brings.

In the UK ERM has offices in London, Oxford, Leeds, Bristol, Swansea, Manchester and Edinburgh. ERM UK currently has acousticians based in London, Oxford, Swansea and Edinburgh, and we operate as part a global practice with acousticians around the world.

ERM's Acoustics team carries out a huge variety of environmental noise and vibration studies, from local development planning studies to major international infrastructure proposals. Our major growth areas include international mining, power, oil and gas, and transport. Over half our work is on projects outside the UK, increasingly focused on major capital projects, such as large scale mines and internationally funded power and transport infrastructure in developing countries.

Successful candidates should have a recognised qualification in acoustics and preferably membership of the Institute of Acoustics.

Candidates should display the skills and attributes typically demonstrated by those with at least, but not limited to, a year of relevant experience in the field of environmental noise. Appropriate training will be encouraged for those who possess a "can-do" attitude and the drive to forge their career within ERM.

ERM offers an extremely competitive remuneration/benefits package, excellent career development opportunities and unrivalled project experience.

To be part of our company, please send your CV to Steve.Mitchell@erm.com or visit www.erm.com/careers

ERM is an equal opportunities employer.
