

Pebble Beach Systems are one of the leading providers of Broadcast Automation having grown significantly since the company was founded in 2000. Our customer base extends around the globe with systems installed throughout Europe, The Middle East, both North and South America, the Far East and Australia. Our main offices are based in Weybridge, Surrey with regional offices in the USA and Dubai.

We currently have vacancies for Support Engineers to work out of the UK office in Weybridge, Surrey. Candidates should hold a high class degree in Broadcast Engineering, Computer Science, Electronic Engineering or a related subject and should be able to demonstrate a desire to provide outstanding customer support. An ability to work on your own initiative and to apply your problem-solving skills to a range of new challenges is essential for the successful candidate. Knowledge of Networking and SQL Databases is an advantage and, while the role doesn't involve any direct requirement to be able to code software or program, an understanding of basic software principles and some experience of a software language is an advantage. Ability to communicate in a second language would be an advantage, though not essential, however anyone with a language skill would be at a particular advantage provided they met the technical and other criteria.

The role would involve some international travel and candidates should ideally hold a full UK/EU driving licence.

This is a customer facing role with the need to communicate both at different technical levels and across different cultures with customers therefore interpersonal skills are an important part of the role. Applicants must already have permanent residency status in the UK.

In return the successful applicant would receive a competitive salary and benefits but also enjoy the ability to work in an interesting and varied role often with a high degree of autonomy.

The selection process will involve pre-filtering CVs of prospective candidates, inviting some of those to complete an online test that we have created and then those that pass the online test will be invited for an interview.

Please apply by sending a CV to Careers@Pebble.tv
